Setting up the Explorer

Hotspot hub is being referred to as **Device** in this manual for the purpose of simplicity

You should install the mobile app or go to the Wicrypt website link www.dashboard.wicrypt.com and create a Wicrypt account.

Connect your Wicrypt Device

1

Insert a SIM card or connect your Wicrypt device via the Ethernet cable to the internet

2

Make sure you are connected to the device network via Wi-Fi or Ethernet cable

3

Open your browser and type in the IP 192.168.4.4 or the URL wicryptlogin.net

Setting up the Explorer

4

Input "admin" as the device password to login to the portal

NB: if you had changed the device password. Input the password you used.

5

Click 'Login'

Switch from Personal to Business

NB: if device had been changed to Business mode, kindly disregard this step

1

Insert a SIM card or connect your Wicrypt device via the Ethernet cable to the internet

Setting up the Explorer

2

Make sure you are connected to the device network via Wi-Fi or Ethernet cable

3

Open your browser and type in the IP 192.168.4.4 or the URL wicryptlogin.net

4

Input "admin" as the device password to login to the portal

NB: if you had changed the device password. Input the password you used.

Setting up the Explorer

5

Click on 'Business'

6

Select Enable

NB: if you have already set the password under the personal mode, kindly disable the password before enabling business mode

7

Click on 'Save Changes'

NB: This will restart the device automatically and you will be required to login into the device network using the Wicrypt app device login code or a voucher.

Staking

How to Stake and Start Mining Wicrypt Network Tokens (WNT)

You have to stake \$100 or more worth of WNT tokens. The exact number of tokens staked will be displayed on your dashboard.

1

Buy Wicrypt Network tokens through the mobile application. Navigate to wallet and click on fund to complete the action.

2

After funding click on the stake option to stake your purchased WNT

3

You will navigate to the staking dashboard then click on 'Stake'

Staking

4

Click on your preferred mode of staking

NB: The flexible mode allows you to unstake at any moment, whilst the locked mode keeps your rewards locked for a set period of time.

5

Lock at least \$100 worth of \$WNT.

6

Click on the 'Stake' Button to continue

Staking

7

Yay! You are all set to start mining and earnings will be displayed in your explorer dashboard.

Device Sync

How to Sync your Physical Hub to your Minted Hub

Note: To sync your device is simply merging the physical hub to the NFT (also known as minted hub)

1

Still logged on the dashboard, click 'My Explorer'

2

Click on 'Hotspot Hubs'

3

Select the minted hub you wish to sync

Device Sync

4

Click on 'Sync Hub'

5

Device Status should show "Unsync Hub"

Note: When the Syncing has initiated, Hub statistics and transactions will now be available.
